

# CD mixer amplifiers

When your sound reinforcement requirements demand a professional, dependable, portable solution, then look no further than the brand new Concept CD mixers from Laney.

These units pack the punch and flexibility that you've come to depend upon from Laney products and are suitable for all demanding pro PA applications such as - live sound and stage monitoring, as well as being suitable for applications such as band rehearsal rooms, churches, function rooms, installations or any venue requiring a portable flexible PA.

Built around ultra reliable 200 and 300 watt power amp sections the CD1042S and CD1090S come equipped with comprehensive pre amp sections packed with features which include: - multiple channel input options, three band EQ, onboard effects routing, individual monitor sends and give the user the flexibility of up to eight XLR inputs and ten 1/4 inch inputs as well as two true stereo channels and an independent stereo Tape/CD/MD/iPod/Line in option.

Combine these features with the ability to assign the onboard power amps to provide either a STEREO MAIN/MAIN signal or a STEREO FOH mix (CD1090S) as well as a totally independent MONITOR MIX or a BRIDGED output for maximum power, all from a single unit and you have a flexibility and portability in a single package that is hard to beat.

CD1042S
