

## THE CX RANGE

The new CX range delivers superior sound quality by utilizing state of the art cabinet design in combination with advanced materials, such as a lightweight, roadworthy moulded polypropylene exterior. The new CX range is a two-way speaker design with power ratings from 300 watts up to 500 watts Program Power. These professional, durable, injection moulded enclosures, are lightweight yet rugged enough for all live music and speech applications.

The new CX-A series combines CX benefits with a flexible 3 channel powered mixer - each channel of which can be used simultaneously! The CX12-A delivers 165 watt RMS, whilst the CX15-A punches out 300 watts RMS.

NEW 2005

The new CXSUB and CXSUB-A are dedicated sub bass cabinets which make ideal partners for the CX, CX-A and CT ranges. The CXSUB-A delivers 300 watts RMS of low end punch.

CX and CXA cabinets can be either be flown using the flying points provided, floor mounted or pole mounted for ease of use depending on the application.

The CT range utilises a full range trapezoidal\* cabinet design available from 200 watts (program) to 400 watts (program) power handling, including a dedicated sub bass cabinet, in 10", 12" and 15" speaker options including HF horns\*
