The new **TT20** and **TTH20** represent the ultimate amplifiers for any

player who wants to **Breathe** unadulterated Tube Tone into their playing from start

to finish. Designed with one thing in mind Total Tube Tone, the TT20 combo and

TTH20 head offer a **Warmth** and tonal quality unsurpassed by today's mass

produced amplifiers. The TT20 pre-amp is equipped with everything the player needs

to achieve great tube tone. The TT single channel format makes achieving your

tone simple, plug **Into** the Hot input in conjunction with the modern switch to

make ultra smooth high gain distortion a breeze, whilst the normal input and

bright switch gives **Your** playing the classy blues tone and bite that sets this

amplifier apart from the competition. The TT range comes equipped with

Pentode/Triode option and TT combo and extension cabinets come fitted with uniquely

voiced 12" HH drivers specially designed to deliver the TT's amazing range of tones and nuances. The TTC-112 extension cabinet is

specifically voiced to be used in conjunction with either the TTH20 or as an extension cabinet to the TT20 — in each case the cabinet has

been designed to give the true tube expert exactly what they are looking for, warm exciting **Tone.**
